AI & GENAI

AI-Assisted Development

Cline, Antigravity, GitHub Copilot

LLM Platforms

Claude, Gemini, ChatGPT, Gemini Code

Agentic Workflows

AI Planning, Prompt Engineering

TECHNICAL SKILLS

Platform & Cloud Native

Kubernetes, Docker, Helm, GitOps

Identity & Security

Keycloak, OAuth2/OIDC, Vault, Kong

Languages & Frameworks

Java, Spring Boot, C#/.NET Core

Cloud Platforms

AWS, Azure (Functions, Service Bus)

Architecture Patterns

Microservices, Event-Driven,DDD

DevOps & CI/CD

Jenkins, GitLab CI/CD, Maven, Git

Databases

PostgreSQL, MySQL

EDUCATION

B.Tech - Information Technology

2010 - 2014

WORK EXPERIENCE

Thales

May 2024 - Present

Senior Technical Lead

Global leader in aerospace, defence, digital identity and security

- Architect inner-source platform serving 8+ product teams, reducing onboarding from weeks to hours
- Leverage GenAI tools (Cline, Claude, Gemini) for accelerated development and planning workflows
- Design security-hardened container base images adopted across business lines
- Own Helm chart ecosystem for Keycloak, Kong Gateway, and HashiCorp Vault

VAKT Global Ltd

Jul 2022 - Apr 2024

Senior Software Engineer

Blockchain leader in post-trade processing for global commodities trading

- Redesigned trade contract matching engine, accelerating settlements from T+5 to T+2
- Architected real-time discrepancy resolution replacing email-based workflows
- Led event-driven architecture migration using message queues, deprecating legacy batch jobs

ThoughtWorks

Nov 2017 - Jul 2022

Senior Consultant / Tech Lead

Global software consultancy

- Architected Kubernetes migration for one of the Big Three consultancies (5M+ visitors), achieving 99.99% uptime
- Designed enterprise OAuth2/OIDC authentication using Keycloak as Identity Provider
- Led event-driven architecture adoption with Azure Service Bus and Functions
- Extracted microservices from monolith, reducing release cycles from monthly to weekly
- Mentored 10+ engineers across client engagements

Ameyo

Mar 2016 - Oct 2017

Application Engineer

Leading contact center technology and customer experience platform

- Developed backend APIs and features for omnichannel contact center SaaS platform

Newgen Software Technologies

Jan 2014 - Feb 2016

Software Engineer

Global provider of low-code digital automation platform

- Built backend components for enterprise process automation and document management

KEY PROJECTS

Enterprise Identity Platform Migration

Led migration from legacy auth to Keycloak OIDC for one of the Big Three consultancies, enabling SSO across global platforms

global platforms

Keycloak, OAuth2/OIDC, Azure, C#, .NET Core, Docker, Kubernetes

vSure Trade Matching Engine Redesign

Redesigned contract matching with real-time comments, eliminating email-based resolution delays

Spring Boot, Java, PostgreSQL, AWS, Jenkins, Cucumber

Event-Driven Architecture with Serverless

Deprecated legacy batch jobs using Azure Service Bus and Functions for reactive processing

Azure Functions, Service Bus, C#, .NET Core
